

BIO FERTILIZER

WHAT YOUR PLANT NEEDS

High-quality organic liquid fertilizer produced as a by-product from the digester tank of the HomeBiogas system. Using this fertilizer you accelerate plant growth and resilience to diseases, and cut out on fertilizer costs. The fertilizer is packed full of essential macro and micro nutrients in a way that allows for rapid absorption by plants.

WHY HOMEBIOGAS FERTILIZER?

Rich in at least 14 macro & micro nutrients crucial for a healthy plant growth.

It's liquid! Can be used before and during planting, to enrich both soil and plant.

Wonderful additive to compost heaps! Enriches the compost and accelerates the process.

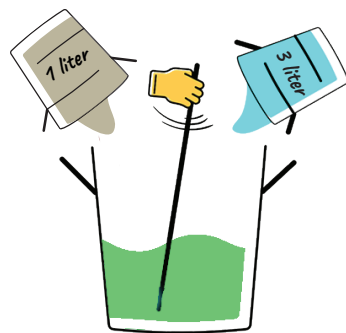

Accelerates growth, resilience to diseases and repels pests.

100% organic! Made by you!

APPLICATION METHOD

HomeBiogas bio-fertilizer should be diluted with water at a ratio of 1:3 litres (to water) before any of the following application methods:

1

BASIC DRESSING:

Prepares your soil for planting. Start applying 1-2 months before planting.

2

TOP DRESSING:

Use as a bio-fertilizer 2-3 times per weeks apply directly to the plants roots.

“I can already see an improvement in my shamba from using the biogas slurry fertilizer”

Daniel, Kenya
